Instrument installation

1.1.1

At assembly in a universal instrument carrier:
Attach instrument in the instrument carrier with a threaded ring.

Please read the respective assembly instructions when using the Indy-Cator attachment set.

1.2.1

Connect red line to battery 12 V (coming from ignition). Connect black line to ground. Board voltage is displayed after ignition activation.

1.2.2

LCD colour setting:

Press button on the rear of the display and keep it pressed until the display colour is changed in steps (16 colours). Release the button when the desired display colour is reached.
